SUMMARY

Final-year Computer Engineering student with strong experience in deep learning, computer vision, and full-stack development. Built and deployed real-world applications including a production-grade client website and a high-performance handwritten text recognition system. Seeking roles in software development, computer vision, or machine learning.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript

Frameworks: React, Next.js

Web Technologies: HTML, CSS, Tailwind CSS

Machine Learning: PyTorch, TensorFlow, OpenCV

Databases: MySQL, MongoDB

Tools: Git, Cloudflare, FastAPI

PROJECTS

Starmed Facility Services Website

Live: starmedfacilityservices.com

Full-Stack Client Project (New Zealand)

Developed and deployed a production-grade website for a New Zealand-based client providing medical and residential cleaning services

Built a responsive frontend using **Next.js (App Router)** and **TypeScript**

Implemented secure contact forms using **API routes** and integrated **Resend API** for email automation

Deployed and managed infrastructure using **Cloudflare Pages and DNS** with **Turnstile** for bot protection

Hindi Handwritten Text Recognition (HTR) System

Deep Learning Project

Designed and trained a custom **ResNet50 + Transformer Decoder** OCR model (32M parameters) on 69,853 handwritten Hindi word images

Achieved **93% word-level accuracy** with a **CER of 0.0226**, outperforming TrOCR baselines while running 16x faster

Built a preprocessing pipeline including **CLAHE, augmentation, and normalization** to improve generalization

Developed and deployed a **FastAPI-based OCR service** with lexicon correction improving accuracy by 7%

EXPERIENCE

Data Science Intern

Prodigy Infotech

May 2024

Remote

Completed 5 data science projects involving EDA, ML, and NLP using Python ecosystem tools

Built a Decision Tree model for customer purchase prediction and evaluated performance

Performed sentiment analysis on social media data using NLP preprocessing techniques

EDUCATION

Dhole Patil College of Engineering

B.E. in Computer Engineering (Current SGPA: 8.90)

Pune, India

2022 – 2026

ACHIEVEMENTS

Published IEEE paper: "A Survey of Handwritten Text Recognition Approaches for Low-Resource Indic Scripts"
